Question: 1

An LTM Specialist needs to gather website statistics such as latency and throughput on the existing virtual server. This virtual server load Balances the backend web servers.
Which F5 feature will provide this?

- A. the Performance panel
- B. the AVR module
- C. the Dashboard
- D. the Statistics panel

Answer: B

Question: 2

Which Standard Virtual Server settings should an LTM Specialist use to load balance across routed path of two different ISPs?

- A. address translation enabled and port translation disabled
- B. both address and port translation enabled
- C. both address and port translation disabled
- D. address translation disabled and port translation enabled

Answer: B

Question: 3

An LTM Specialist needs to terminate client SSL traffic and based on the cookie presented by client.
Which set of profiles should the LTM Specialist use?

- A. HTTPS, Client SSL, Cookie Persistence Profile
- B. HTTP, Server SSL, SSL Cookie Profile
- C. HTTPS, Server SSL, SSL Cookie Profile
- D. HTTP, Client SSL, Cookie Persistence Profile,

Answer: D

Question: 4

An LTM Specialist observes decreased performance and intermittent connection reaps LTM system.

```
lrm pool main http_pool {
  load-balancing-mode observed-node
  members {
    10.10.0.100:8080 {
      address 10.10.0.100
    }
    10.10.0.101:8080 {
      address 10.10.0.101
    }
    10.10.0.99:8080 {
      address 10.10.0.99
    }
  }
  monitor http
}

lrm profile tcp corp_tcp {
  app-service none
  defaults-from tcp
  idle-timeout 14400
}

lrm virtual main vsp-http {
  destination 192.168.3.100:80
  ip-protocol tcp
  mask 255.255.255.255
  profiles {
    http {
      corp_tcp {
        pool {
          main_http_pool
        }
      }
    }
  }
  source 0.0.0.0/0
}
```

Based on the configuration, which action will address these issues?

- A. Use an optimized TCP profile.
- B. Use a FastL4 profile on the virtual server
- C. Use a default caching profile on the virtual server.
- D. Use a shorter idle timeout on the TCP profile.

Answer: D

Question: 5

An LTM Specialist regularly provides analytics reports that show that traffic generated by different subnets within the organization. The LTM Specialist needs show the associate department names next the IP addresses in the reports.

Which step should the LTM Specialist take to meet this requirement?

- A. use an iRule to change the output of the report
- B. export the report and add the department names manually
- C. create VLANs for each subnet and set the name accordingly
- D. define active subnets and assign a name to certain subnets

Answer: C
