Question: 1

You work as a network administrator for ABC.com. The ABC.com network consists of a single Active Directory domain named ABC.com. There are currently 120 Web servers running Windows Server and are contained in an Organizational Unit (OU) named ABC_WebServers

ABC.com management took a decision to upgrade all Web servers to Windows Server. You disable All services on the Web servers that are not required. After running the IIS Lockdown Wizard on a Recently deployed web server, you discover that services such as NNTP that are not required are still enabled on the Web server.

How can you ensure that the services that are not required are forever disabled on the Web servers Without affecting the other servers on the network? (Choose two.)

- A. Set up a GPO that will change the startup type for the services to Automatic.
- B. By linking the GPO to the ABC_WebServers OU.
- C. Set up a GPO with the Hisecws.inf security template imported into the GPO.
- D. By linking the GPO to the domain.
- E. Set up a GPO in order to set the startup type of the redundant services to Disabled.
- F. By linking the GPO to the Domain Controllers OU.
- G. Set up a GPO in order to apply a startup script to stop the redundant services.

Answer: B, E

Question: 2

The ABC.com network consists of a single Active Directory domain named ABC.com. All servers on the ABC.com network run Windows Server.

ABC.com contains a member server named ABC-SR24. ABC-SR24 is configured as a File and Print server and hosts shared folders for all ABC.com users.

One morning a ABC.com user named Dean Austin complains that ABC-SR24 responds poorly at various times throughout the day. You suspect that the poor performance is caused by broadcast traffic on the ABC.com network.

What would be the best way to monitor ABC-SR24 while minimizing administrative effort?

- A. Use System Monitor to monitor the Datagrams/sec counter in the UDPv4 object.
- B. Double click on the Local Area Connection and view the status of the network connection.
- C. Open Task Manager and monitor the Networking tab.
- D. Configure an alert in Performance Monitor to send you an alert when the Datagrams/sec counter in the UDPv4 object is high.

Answer: D

Question: 3

The only protocol used by your network is TCP/IP, despite the fact that workstations in the organization do not have access to the Internet. A user has been accessing files on server on your network and now wants to connect to a Web server that is used as part of the company's intranet. The user enters the URL of the Web site into Internet Explorer.

Which of the following servers will be used to provide information needed to connect to the Web server?

- A. DHCP server
- B. DNS server
- C. WINS server
- D. File server

Answer: B

Question: 4

The only protocol used by your network is TCP/IP, despite the fact that workstations in the organization do not have access to the Internet. A user has been accessing files on server on your network and now wants to connect to a Web server that is used as part of the company's intranet. The user enters the URL of the Web site into Internet Explorer.

Which of the following servers will be used to provide information needed to connect to the Web server?

- A. DHCP server
- B. DNS server
- C. WINS server
- D. File server

Answer: B

Question: 5

You are the network administrator for your company. The network consists of a single Active Directory domain with five domain controllers that run Windows Server, Enterprise Edition. You are updating the public key infrastructure (PKI) for your company. Issuing Certification Authorities (CAs) have been provided certificates with a validity period of five years. Certificates are issued to enable network users to encrypt files on their computers. Basic EFS certificates have been issued and have been configured with the default validity period. You want to configure all new EFS certificates so that they are valid for up to three years. What should you do? Each correct answer presents part of the solution. (Choose all that apply.)

-
- A. Duplicate and rename the Basic EFS certificate template.
 - B. Open the Basic EFS certificate template Properties dialog box.
 - C. Select the General tab and edit the validity period.
 - D. Select the General tab and edit the renewal period
 - E. Select the Security tab and change the permission for the Administrators group to Enroll.
- sabese plsoahwroa.wten A ctive Directory site

Answer: A , C
