Question: 1

The TFTP protocol is a protocol based on _____.

Response:

- A. UDP
- B. TCP
- C. IPX
- D. SSH

Answer: A

Question: 2

Which of the following statements about optical fiber are correct?

(multiple choice)

Response:

- A. When using multi-mode fiber, the maximum signal transmission distance is longer than single-mode fiber
- B. The cost of multimode fiber is lower than that of single mode fiber
- C. Multimode fiber can transmit light of different wavelengths and different incident angles
- D. Multimode fiber has a thinner core

Answer: B,C

Question: 3

Common FTP file transfer types include _____.

(Multiple choice)

Response:

- A. Local type
- B. EBCDIC type
- C. ASCII code type
- D. Binary type

Answer: C,D

Question: 4

UDP belongs to the _____ of the OSI reference model.

Response:

- A. Transport layer
- B. Presentation layer
- C. Session layer
- D. Network layer

Answer: A

Question: 5

In the routing table of an MSR router, which of the following sources of routes may be included? (multiple choice)

Response:

- A. The route discovered by the dynamic routing protocol
- B. The route discovered by the network layer protocol
- C. Route of directly connected network segment
- D. The static route manually configured by the network administrator

Answer: A,C,D

Question: 6

On the MSR router, use the _____ command to view the current running version of the device.

Response:

- A. display current-version
- B. display running
- C. display software
- D. display version

Answer: D

Question: 7

After turning on the debugging, you can use the _____ command to turn off the debugging.

Response:

- A. undo terminal monitor
- B. undo terminal debugging
- C. undo debugging all
- D. no debugging all

Answer: C

Question: 8

For the understanding of packet switching, the correct one of the following statements is _____.
(Multiple choice)

Response:

- A. Packet switching includes frame-based packet switching and cell-based packet switching
- B. Each packet carries the address identification of the receiver and the sender, and the packet can be forwarded directly without any operation, thereby improving efficiency
- C. Packet switching is a switching method based on Store-and-Forward switching
- D. The transmitted information is divided into packets of a certain length and forwarded in units of packets

Answer: A,C,D

Question: 9

Regarding the compressed expression of the IPv6 address 2001:0410:0000:0001:0000:0001:0000:45FF, which of the following is correct?

(multiple choice)

Response:

- A. 2001:410::1::45FF
- B. 2001:410:0:1::45FF
- C. 2001:410:0:1:0:1:0:45FF
- D. 2001:41:0:1:0:1:0:45FF

Answer: C

Question: 10

According to the different sources, the routes in the routing table are usually divided into the following categories?

(multiple choice)

Response:

- A. Interface routing
- B. Dynamic routing
- C. Direct route
- D. Static routing

Answer: B,C,D
