Question: 1

The data integration team at a financial services company has always struggled to manage resources as the number of integration jobs changes throughout the month. Which two settings are available when configuring Dynamic Workload Management for a specific DataStage instance?

Response:

- A. Job Count (JobCount)
- B. Job Log Retention (log_retention)
- C. ETL/ELT Mode (ETL, ELT, or Hybrid)
- D. Job Configuration File (APT_CONFIG_FILE)
- E. Auto-scaling (computePodsMin, computePodsMax)

Answer: A,E

Question: 2

What happens when the maximum number of new service instances is reached in Watson Discovery?

Response:

- A. A reset command is required.
- B. There is no option to create more.
- C. The user is warned that all service instances will stop.
- D. The oldest service instance is deleted to maintain the maximum number.

Answer: B

Question: 3

What is used to monitor workloads when running Db2 Warehouse as a Cloud Pak for Data service?

Response:

- A. Db2 Graph server
- B. Db2 Control Center
- C. Db2 Data Management Console
- D. Db2 Administration Framework

Answer: C

Question: 4

How does IBM Data Virtualization aid in the creation of a Data Fabric?

Response:

- A. It suspends access to a data source once a usage threshold is exceeded.
- B. It is a replication tool that brings data from all sources together in one location.
- C. It uses AI to predict where data will be used and relocated data for the best performance.
- D. It allows data engineers to customize access to data across multiple data sources, then publish the resulting objects in a catalog.

Answer: D

Question: 5

What is the primary requirement to enforce data privacy in Cloud Pak for Data?

Response:

- A. Data Privacy service is installed.
- B. A properly configured Governance Catalog.
- C. Data source access control lists are properly defined.
- D. Data assets are exclusively accessed through IBM Data Virtualization.

Answer: B

Question: 6

An organization has created an extensive number of data protection rules as part of their Cloud Pak for Data implementation. The governance team is working on developing best practices for their team to maximize this investment.

Which service can be used to create a copy of cataloged asset data with all data protection rules applied?

Response:

- A. DataStage
- B. Data Privacy
- C. SPSS Modeler
- D. IBM Data Virtualization

Answer: B

Question: 7

What statement is true about tethered projects?

Response:

- A. Tethered projects can be shared by multiple instances of Cloud Pak for Data.
- B. A tethered project cannot have its own NetworkPolicies, SecurityContext and ResourceQuota.
- C. All Cloud Pak for Data services support running workloads or service instances in tethered projects.
- D. Use tethered projects to isolate service instances or workloads from the rest of the Cloud Pak for Data deployment.

Answer: D

Question: 8

Which mechanism will ensure long term system stability of a Cloud Pak for Data environment?

Response:

- A. Add more worker nodes.
- B. Setup pod autoscaling to set a resource limit for all Cloud Pak for Data service pods.
- C. Adjust the data throttle property on a per user basis to limit data throughput to available resources.
- D. Enforce quotas to specify the maximum amount of memory and vCPU for the platform, a specific service, or a project.

Answer: D

Question: 9

Which API allows the management of users, roles, and authentication, as well as monitors the status of the Cloud Pak for Data platform?

Response:

- A. Alerting
- B. Watson Data
- C. Credentials and Secrets
- D. Cloud Pak for Data Platform

Answer: D

Question: 10

Which Cloud Pak for Data predefined role has permission to create service instances?

Response:

- A. Data Steward
- B. Data Engineer
- C. Data Scientist
- D. Reporting Administrator

Answer: B
