Latest Version: 6.0

Question: 1

The NSX management cluster primarily functions to?
Response:

A. Manage the NSX environment
B. Direct traffic within the data plane
C. Encrypt network traffic
D. Provide physical connectivity

Answer: A

Question: 2

Which routing protocol configuration options are available in NSX?
Response:

A. BGP
B. OSPF
C. RIP
D. EIGRP

Answer: A,B

Question: 3

Why are L2 bridging services used in NSX Edge designs?
Response:

A. To replace the need for physical routers entirely
B. To connect virtual and physical workloads without changing the IP scheme
C. To simplify firewall rules by bypassing them
D. To ensure that all traffic passes through a single choke point for monitoring

Answer: B

Question: 4

Stretched security use cases in Federation are primarily designed to?
Response:

A. Maintain consistent security postures across multiple locations
B. Eliminate the need for a security policy
C. Focus solely on physical security enhancements
D. Reduce the overall number of firewalls deployed

Answer: A

Question: 5

NSX single-tier routing architecture is best suited for which scenario?
Response:

A. Large-scale deployments with complex routing requirements
B. Smaller environments or applications with simple routing needs
C. Situations requiring extensive physical to virtual network integration
D. Networks needing advanced firewalling between segments

Answer: B

Question: 6

What does gateway high availability in NSX focus on?
Response:

A. Reducing the cost of network infrastructure
B. Ensuring continuous traffic flow during failures
C. Simplifying network management tasks
D. Enhancing the physical security of network devices

Answer: B

Question: 7

A best practices for securing a VMware ESXi host are?
Response:

A. Regularly updating the ESXi host firmware
B. Installing video games on the host

C. Disabling unnecessary services and ports
D. Creating a social media page for the host

<div style="text-align: right;">

Answer: A,C

</div>

Question: 8

The stretched networking capability in Federation allows for?
Response:

A. Extension of Layer 2 networks across sites without physical links
B. Seamless mobility of applications across data centers
C. Use of a single IP address for all site locations
D. Reduction in the need for global load balancing

<div style="text-align: right;">

Answer: B

</div>

Question: 9

How does the placement of stateful services in an NSX Edge design affect the system?
Response:

A. The overall system performance and scalability
B. The color scheme of the NSX Manager UI
C. The licensing costs associated with NSX
D. The physical dimensions of the data center

<div style="text-align: right;">

Answer: A

</div>

Question: 10

When designing for growth in edge clusters, what is important?
Response:

A. Allow for flexible scaling of resources and services
B. Permanently fix resources at the time of initial deployment
C. Focus exclusively on immediate needs, ignoring future growth
D. Prioritize aesthetic considerations in the data center

<div style="text-align: right;">

Answer: A

</div>

PRODUCT FEATURES

- **100% Money Back Guarantee**
- **90 Days Free updates**
- **Special Discounts on Bulk Orders**
- **Guaranteed Success**
