Response:

A. Increased software installation time
B. Reduced flexibility in software management
C. Enhanced scalability and isolation
D. Dependency on a specific underlying OS

Answer: C

Question: 6

Which of the following practices is NOT recommended for securing message flows?
Response:

A. Using default security settings
B. Regularly updating security protocols
C. Encrypting sensitive data
D. Implementing message flow monitoring

Answer: A

Question: 7

User-defined extensions in App Connect Enterprise are typically used for:
Response:

A. Changing the color scheme of the tool interface
B. Adding custom processing logic

C. Removing existing functionality
D. Updating the tool's license

Answer: B

Question: 8

Which of the following are effective optimization techniques for integration solutions?
(Choose two)
Response:

A. Minimizing network calls within message flows
B. Using larger data chunks to reduce the number of messages
C. Ignoring error handling to speed up processing
D. Increasing the number of concurrent threads without limit

Answer: A,B

Question: 9

What types of flows are available in IBM App Connect Enterprise Toolkit?
Response:

A. Message flows
B. Integration flows
C. Mediation flows
D. Event flows

Answer: A,B

Question: 10

In the context of extending App Connect Enterprise, which of the following statements are true?
(Choose two)
Response:

A. Custom plugins can be created to extend the functionality.
B. Extending the tool always requires changes to the source code.
C. It is possible to integrate with custom security models.
D. Extensions can only be developed in C++.

Answer: A,C
