1. Fundamentals
2. SAP BW/4HANA Project Modeling Process
3. Data Acquisition into SAP BW/4HANA
4. Data Modeling Design
5. Performance Optimization
6. SAP Datasphere
7. Data Governance Security Authorization
8. SAP BW Query Design

Topic: 1
Fundamentals

Question: 1

For which scenarios do you use the SAP HANA model focus? Note: There are 2 correct answers to this question.

A. Load snapshots using ABAP CDS Views.
B. Build views procedures using SQL script.
C. Define ABAP Managed Database Procedures in data flows.
D. Define calculations using geospatial functions.

Answer: B, C

Fundamentals

Question: 2

For which reasons should you run an SAP HANA delta merge? Note: There are 2 correct answers to this question.

A. To decrease memory consumption
B. To combine the query cache from different executions
C. To move the most recent data from disk to memory
D. To improve the read performance of InfoProviders

Answer: A, D

Fundamentals

Question: 3

What are the reasons for implementing Composite Providers? Note: There are 2 correct answers to this question.

A. To persist combined data for reporting
B. To directly expose an SAP HANA table from an external schema
C. To provide an interface for using BW queries
D. To provide a virtual data mart layer that combines existing BW models

Answer: C, D

Fundamentals

Question: 4

What foundation is necessary to use SAP S/4HANA embedded analytics?

A. SAP HANA optimized business content
B. ABAP CDS view based virtual data model
C. Generated external SAP HANA Calculation Views
D. SAP Agile Data Preparation

Answer: B

Fundamentals

Question: 5

How can the delta merge process be initiated in SAP BW/4HANA? Note: There are 2 correct answers to this question.

A. By using a specific process type in a process chain
B. By using the SAP BW/4HANA data load monitor
C. By setting a specific flag in the transformation
D. By setting a specific flag in the data transfer process

Answer: A, D

Fundamentals

Question: 6

Which SAP BW/4HANA objects support the feature of generating an external SAP HANA View? Note: There are 2 correct answers to this question.

A. BW query

B. Open ODS view
C. Composite Provider
D. Semantic group object

Answer: A, C

Fundamentals

Question: 7

Which are purposes of the Open Operational Data Store layer in the layered scalable architecture (LSA++) of SAP BW/4HANA? Note: There are 2 correct answers to this question.

A. Harmonization of data from several source systems
B. Transformations of data based on business logic
C. Initial staging of source system data
D. Real-time reporting on source system data without staging

Answer: A, D

Fundamentals

Question: 8

Which layer of the layered scalable architecture (LSA++) of SAP BW/4HANA is designed as the main storage for harmonized consistent data?

A. Open Operational Data Store layer
B. Data Acquisition layer
C. Flexible Enterprise Data Warehouse Core layer
D. Virtual Data Mart layer

Answer: C

Fundamentals

Question: 9

Which development object needs to be built to generate an HDI Container?

A. Space
B. HDB module
C. Package
D. SQL script procedure

Fundamentals

Question: 10

Which features of an SAP BW/4HANA InfoObject are intended to reduce physical data storage space?
Note: There are 2 correct answers to this question.

A. Reference characteristic
B. Transitive attribute
C. Compounding characteristic
D. Enhanced master data update

Answer: A, B
